

Get back to feeling like yourself. Naturally.

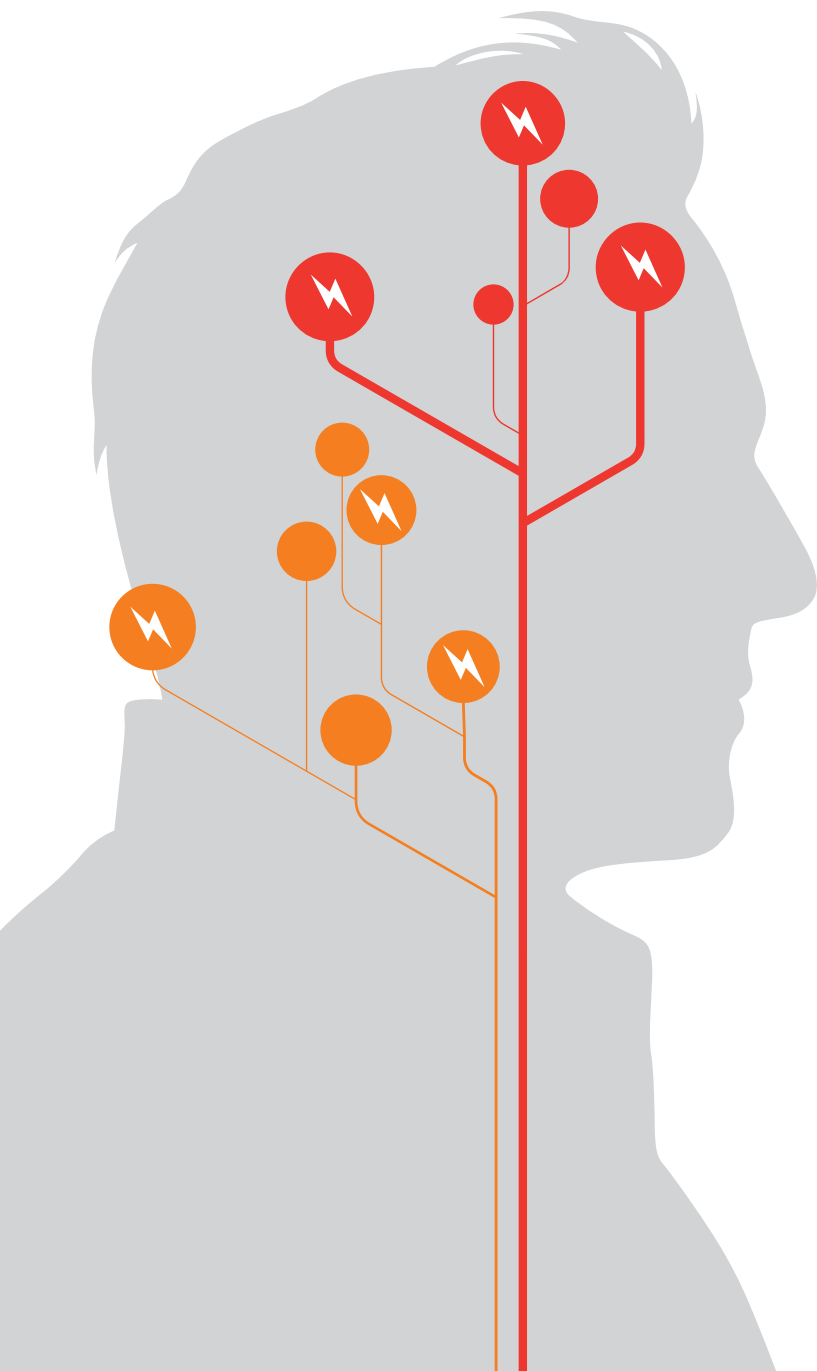

NEURO SERVICES HEALTH

Natural treatment for neural and chronic pain

When your brain or neural system has been traumatized or damaged, your body is unable to function properly.

*Concussions, migraines, dizziness, loss of balance and foggy memory* are just some of the symptoms you may experience as a result. Ultimately, you don't feel yourself and are unable to live your life to its fullest potential.

**NeuroHealth Services** helps patients regain their lives by discovering the root cause of their chronic pains, migraines and other neurological problems. There are times when medication and surgery are needed, but in a majority of cases, these can be avoided.

Often, our findings and therapies can provide insights to traditional medical care so they can be applied in a more targeted manner.

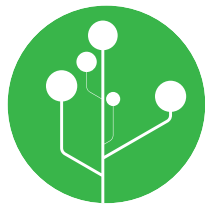

## DRUGS AND SURGERY **DON'T** HAVE TO BE YOUR FIRST OPTION

Many people are conditioned to first go to a traditional hospital where medication and/or invasive surgery are the usual treatments. These intensive treatments add to the already high cost of healthcare and may impact your insurance premiums.

As we all have experienced, medications may ease the pain, but rarely affect the root cause of the issue and may have unwanted or adverse side effects. We end up trading one symptom for another. Surgery may be necessary in extreme cases, but the vast majority of neural and brain-related pains can be healed through non-invasive treatments and techniques.

## NON-INVASIVE HEALING IS YOUR **BEST** CHOICE

The next generation of healthcare treatment is based in a more holistic and natural treatment methodology. We're not talking about some woo-woo, new age treatment scheme, but a healing approach that does not use drugs or invasive surgery.

[NeuroHealth Services](#) evaluates the entire person (brain, hormones, immune system, musculoskeletal) and determines the best way to get results in the shortest amount of time. We integrate traditional Chiropractic care, Functional Neurology, Endocrinology and Immunology. This is called Chiropractic Neurology. We identify, and treat, the root cause of your pain and do not simply treat the symptoms.

What all this means is we focus on the brain-body connection. The brain controls our body and our body provides feedback to the brain. When either end of this relationship breaks down, your health is soon to break down as well. Our main goal is to identify and address the breakdown and apply a therapy to fix the root cause.

## WHO WE HELP

Unfortunately, many of our patients come to us out of frustration with their current healthcare. The most common complaint is, "I'm so discouraged with the medical system. I'm frustrated because I've been to this doctor, this acupuncturist, this massage therapist, this chiropractor, but nothing is working and I don't know what else to do."

We're here to help correct a life-altering condition and give you results that are long lasting. Here is a sample list of conditions our patients come to us for:

- Concussions
- Migraines
- Dizziness/Vertigo
- Back pain
- Visual Disturbances / Double Vision / Amblyopia
- Chronic infections
- Chronic Fatigue Syndrome

Please visit our web site ([NeuroHealthServices.com](http://NeuroHealthServices.com)) for a comprehensive list of conditions we treat.

## CONTACT US FOR A **FREE** CONSULTATION

If you are suffering from neural, back and chronic pain, please come see us. If you are frustrated with the lack of answers from your current healthcare options, we can bring clarity.

There is no need to be in pain and just having to "deal" with it. Call us for a FREE consultation and examination. We are committed to finding answers and start the healing process.
